

# Do you have Non-Cystic Fibrosis Bronchiectasis (NCFB)?

## Are you interested in taking part in this clinical study called MAHALE?

**MAHALE** will be investigating whether a study treatment may provide benefit to patients with **NCFB**.

### Who can join?

You may be suitable to join if you:

- ✓ Are aged 18 years or above
- ✓ Have been diagnosed with NCFB
- ✓ Are on airway clearance therapy, physiotherapy, or mucus clearance therapy
- ✓ Experienced worsening symptoms of your disease (exacerbation) twice within a year
- ✓ Do not have another lung condition such as asthma or COPD\*

### What will the study involve?

You will be asked to attend monthly clinic appointments to:

- ✓ Receive the study treatment as an injection under your skin
- ✓ Undergo a number of tests or assessments
- ✓ Complete a series of daily or intermittent questionnaires on an electronic hand-held device

### Why participate?

The findings of this study will be used to help develop new NCFB treatments.

If you are eligible to take part, you:

- ✓ Will receive expert medical care, related to the study
- ✓ Will help make a difference for people diagnosed with NCFB in the future

If you are interested in the MAHALE study, please speak with your doctor or email: [information.center@astrazeneca.com](mailto:information.center@astrazeneca.com)

\*COPD = chronic obstructive pulmonary disease.
