

DO YOU OR YOUR CHILD HAVE HYPEREOSINOPHILIC SYNDROME (HES)?

The NATRON study is now enrolling patients 12 and older.

Who can join?

You may be able to join this study if:

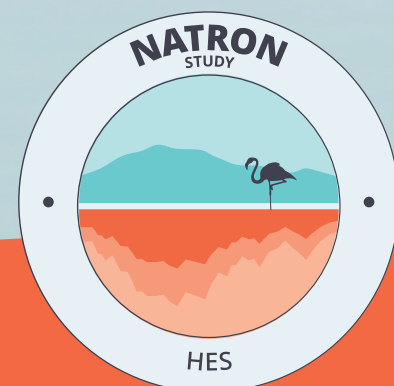

- ✓ You or your child are at least 12 years old
- ✓ You have a diagnosis of HES
- ✓ Your HES requires treatment

Why participate?

The findings of this study may be used to help develop new HES treatment*. If you are eligible to take part, you will:

- ✓ Receive a study drug that is not yet available to the public
- ✓ Receive additional health monitoring at no cost to you
- ✓ Help make a difference for people diagnosed with HES in the future

*During this study you will receive an experimental treatment which is being evaluated for HES. It is not yet known whether it is safe or effective in HES.
